- Handsome, sturdy binding •

All new for '66

ELECTRONIC TECHNICIAN

Subscribe now and get this
valuable introductory gift
absolutely free!

Dear Technician:

Here's an opportunity for you to get, in one convenient book, over 100 of 1965's most used, most popular TV schematics.

It's the new 107 TEKFAX -- the latest in the famous series of schematic books compiled by the editors of ELECTRONIC TECHNICIAN.

This king-sized book is available to you absolutely free of charge as an introductory gift for trying ELECTRONIC TECHNICIAN, the world's leading magazine for TV-radio, Hi Fi and two-way communications service-dealers and technicians.

Certainly you've heard plenty of talk about previous editions of these TV-Radio schematics. Again and again, technicians have told us that these big volumes are literally "Worth their weight in gold."

You get schematics and service data on hundreds of chassis and model numbers. Along with the big 11 x 15 schematics, you get a wealth of valuable service data, including operating voltages, alignment data, waveforms, tube location guides, and much, much more.

You can imagine what these schematics--128 pages of them--would cost if you tried to buy them separately or in sets. Yet, the entire book is yours free for trying ELECTRONIC TECHNICIAN for the next 24 months.

And once you've tried ELECTRONIC TECHNICIAN, we're confident you will agree that it is a bargain at any price.

For example...

Only in ELECTRONIC TECHNICIAN do you get, with each and every issue, a complete set of TEKFAX -- up to eight king-sized schematics of all the newest TV sets to hit the market. These big 11 x 15 schematics come complete with parts lists, voltage readings, waveforms, tube and parts layout, tuner information, adjustment locations, plus special manufacturer's servicing data.

Imagine how much you would spend if you purchased these schematics from the manufacturer, or if you subscribed to an expensive schematic publishing service. I think you'll agree with many other technicians who say such a service could cost up to \$300 to \$400 a year.

But as an ELECTRONIC TECHNICIAN subscriber these 70 to 80 schematics come to you entirely free with a two years' subscription.

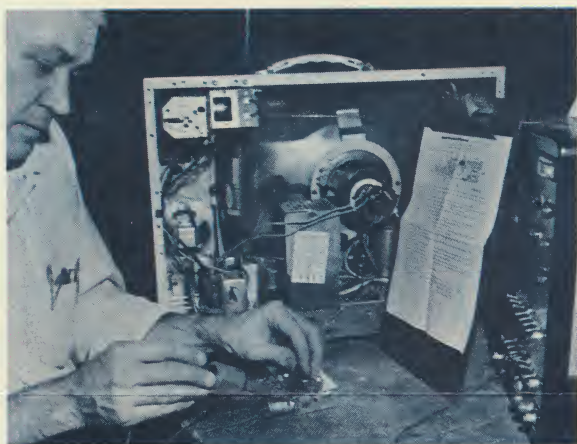

DJIBWAY BUILDING, DULUTH, MINNESOTA 55802

What's more you can be sure that you get all of the important sets to be published, not the useless dust collectors. Each month ET's staff of editors carefully screens each schematics available and then gives you the ones you need most in an easy to read, easy to use format.

That's just one part of this great package that will come to you.

Each month ELECTRONIC TECHNICIAN will bring you a wealth of "shirt-sleeve" trouble-shooting and repair articles. Firsthand, from manufacturers technical specialists, from technical experts in the field, from other service technicians and from specialists in "ET's" own lab, you'll learn how to solve virtually every service problem you'll ever tangle with. You'll learn how to do these jobs quickly, expertly and at a profit.

Look at just a few samples from recent issues...

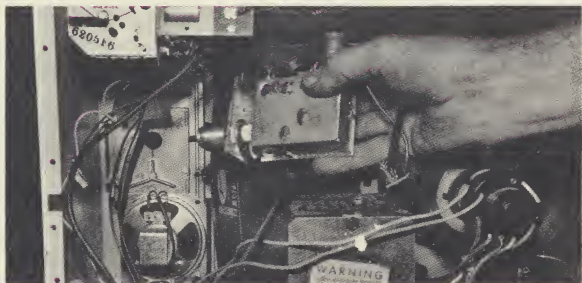

Understand the Burst Signal as the Key to
Proper Color Reproduction
Basic Color Principles
Tips on Color Servicing
Transistor Circuit Fundamentals
Color TV Horizontal Problems
Probes - An Effective Tool
Selecting a VOM
The Intelligent Approach to Capacitor Checking
Selecting Replacement Yokes
Antennas for Color TV and FM/Stereo
This Roaring CB Business
Picture Tubes - Black and White and Color
Servicing 2-way Narrow-Band FM Equipment

You'll also get easy to follow step-by-step picture stories showing you how to install and service 2-way radios, tools and techniques for auto radio repair, servicing electronic organs and closed circuit TV.

Just as important, ET will keep you constantly posted on the latest test instruments, how to get the most out of them, what to buy, how to repair them...

Semiconductor Testers
Oscilloscopes
Get the Most From Your VOM
You and Your VTVM
Specs on Sweep Generators
Color/Bar Generators

ELECTRONIC TECHNICIAN is the magazine for professionals, and unlike hobby and news-stand magazines, ET brings you professional advice on how to run your business at a bigger profit:

Basic Business Practices
Your Records can Save Your Business
Shining Up to New Customers
Where Should You Relocate
Realistic Service Charges
Writing Better Ads
Customer Relations
Your Credit Policy Can Make or Break You
Reap the Benefits of Planned Advertising

You can also look forward to a score of regular departments in every issue of ELECTRONIC TECHNICIAN--the famous "Colorfax" columns; "Sync on Business; Then there's a Free Literature Report; New Book Reviews; Technical Digest; New Products; New Sets.

We could go on and on--telling you how helpful you'll find ET; how it is America's most valuable source of servicing and installation know-how; how more men like yourself subscribe to it than to any other magazine like it in the world.

ET is a professional magazine for professionals only! And one idea alone from just one issue could make you a profit much larger than the small subscription price.

ELECTRONIC TECHNICIAN comes to you for only \$8 for two full years (24 issues)--or three years for only \$10. I think you'll agree that this is a mighty good investment--only pennies a week gives you TEKFAK schematic service Plus an endless list of technical articles and features. (As you know, ET is not sold on the newsstands.)

And now that you can get the famous TEKFAK book FREE--as an introductory bonus--this offer is without doubt the best buy ever. What's more, we will guarantee this offer.

If the big book of TEKFAK isn't as valuable as we say it is--or if you aren't 100% satisfied with your first issue of ELECTRONIC TECHNICIAN--we will refund your subscription with no questions asked.

There's no question about it--you just can't lose. So what better time than right now to enter your subscription to ELECTRONIC TECHNICIAN, the world's leading electronic publication.

Please remember, though, that because of the costs involved in producing this big 107 book, the number of copies available are limited. Requests must be strictly treated on a first-come, first-served basis. (Previous editions of TEKFAK have been a complete sellout!) We urge you, therefore, to sign the enclosed postage-paid card and drop it into the mail--right now while you're thinking about it. Then you can put ET and the 107 to work for you right away.

Your credit is good. We'd be glad to bill you later if you prefer.

Cordially,

Joe Wolking
